COLONOSCOPY INSTRUCTION SHEET

John T. Dugan III, M.D.          David S. Wolf, M.D.          M. Behzad Zafar, M.D.

Procedure Date: ___________________________  Scheduled Time: ___________________________

Please arrive at the procedure center one hour before your scheduled time.

Please call the procedure center at least 5 days in advance and pre-register for your endoscopy.

Your procedure is scheduled at one of the following facilities:

Medical Center Endoscopy
6560 Fannin Street
Suite 600, Sculock Tower
Ph: 713-796-0500

The Methodist Hospital TMC
Endoscopy Center
6550 Fannin Street
Suite 649, Smith Tower
Ph: 713-441-5470
Registration: 713-394-6805

Memorial Hermann Hospital TMC Ertan
Endoscopy Center
6400 Fannin Street
14th Floor
Ph: 713-704-6500

The results of this test depend on your colon being carefully cleansed and emptied. Feces (stool) in the colon can hide disease and tumors that may be present. Please follow these instructions as carefully as possible; otherwise the exam may be inaccurate or need to be repeated.

Prior to your procedure, you may receive a call from the Business Office at Medical Clinic of Houston. If you do not, please call the clinic and ask for the Business office.

You will be receiving sedation for your procedure. Therefore, you must have a responsible adult available to transport you home after the procedure. If you do not have someone available to drive you home, your procedure will be rescheduled.

If you are taking any blood thinners (for example: Plavix, Coumadin, Warfarin, Xarelto, Eliquis, Effient, Pradaxa, Brilliant etc.) or diabetic medications, please call our office immediately to discuss how to manage your medications.

Additional information: http://patients.gi.org/topics/colonoscopy

Additional information: http://patients.gi.org/topics/sedation-for-endoscopy

Should you have any other questions or concerns, please contact our office.

7 DAYS BEFORE THE PROCEDURE:

- Arrange an escort for transportation after the procedure. You will be given anesthesia, so you cannot drive a car or take a bus/taxi home.
- Stop taking iron supplements, vitamin E, ginko, garlic and fish oil.
- Stop taking any fiber supplements (Metamucil, Citrucel, Fibercon etc.).
- Stop taking Aspirin for 5 days before the procedure. If you have a STENT, you can continue Aspirin 81 mg daily.

3 DAYS BEFORE THE PROCEDURE:

- Confirm your escort for transportation.
- If you need to cancel or reschedule the procedure, please call our office immediately.
- Review the diet you need to follow for the next 2 days, and plan your meals accordingly.
- Stop taking all anti-inflammatory medications. These include but are not limited to Nuprin, Bufferin, Anacin, Advil, Motrin, Indocin, Voltaren, Aleve, Ecotrin, Relafen, Alka Seltzer, Naprosyn or Meloxicam. If you need a pain reliever, the only medication we advise is Tylenol.
2 DAYS BEFORE THE PROCEDURE:

- Drink at least 8 glasses of water throughout the day.
- Stop eating seeds, popcorn, nuts and whole grains.
- Start a low residue diet. **Allowed:** soup, fish, chicken, eggs, white rice, white bread, crackers, plain yogurt, pasta, potato with no skin, gelatin, broth, bouillon, all liquids. **Avoid:** fresh/dried fruit, raw vegetables or those with seeds, corn, whole grain bread, raisins, cloves, any other meat besides what is listed above.

24 HOURS BEFORE THE PROCEDURE: START A CLEAR LIQUID DIET.

If your procedure is in the morning: start the clear liquid diet a whole day before the procedure.

If your procedure is in the afternoon: start the clear liquid diet on the afternoon before. So you may have a light breakfast (toast & coffee) on the morning before the procedure date.

If you put a liquid in a clear glass, and you can see through it, it is probably safe to drink. A clear liquid diet can include:

- Apple, white grape and white cranberry juices.
- Clear beef or chicken broths, without solid pieces of food in it.
- Tea or coffee without milk.
- Clear sodas, Gatorade, Kool-Aid (no red colors).
- Popsicles, various Jello flavors (no red colors).

Avoid:

- Red and purple coloring in any of the beverages that you drink.
- Juices with pulp.
- Milk, cream, ice cream and all solid foods.

EVENING BEFORE THE COLONOSCOPY: Start the laxative bowel prep. Follow the detailed instructions on the attached sheet (Suprep, Prepopik, Moviprep etc.).

- The prep will consist of two separate doses.
- Drink the first dose around 6 pm on the evening before the colonoscopy.
- Drink the second dose 6 hours before the scheduled procedure time.

THE DAY OF YOUR PROCEDURE:

- Do not eat or drink anything, including water, with the exception of your laxative prep.
- You must be on an empty stomach for at least 6 hours before the procedure; otherwise we may have to reschedule the procedure.
- You may take important medications (like heart or blood pressure meds etc.) with a small sip of water on the morning of your procedure. If your procedure is scheduled early (before 10 am), you may want to wait until after the procedure to take your medicines.
- If you are on Insulin, do not take your morning dose on the day of the procedure.
- Bring a complete list of all your medications with you to the endoscopy center.
- Wear comfortable clothing. Please leave all your jewelry and valuables at home.

HELPFUL TIPS:

- Some people develop nausea or vomiting during the bowel prep. The best remedy for this is to take a break from drinking the solution for about 30 minutes and then resume. It is important to drink the entire prep solution.
- Walking between drinking each glass can help with the bloating.
- Use baby wipes instead of toilet paper.
- Apply some Vaseline or Desitin to the anal area prior to starting the laxative prep and re-apply as needed.
- Remain close to toilet facilities as multiple bowel movements may occur.
- If you are diabetic, use sugar-free drinks during the prep and monitor your blood sugar closely to prevent low blood sugar. Use an insulin sliding scale if needed for high values.
General Colonoscopy Information

COLONOSCOPY: It is an endoscopic procedure performed on a clean, prepared colon using a flexible scope with fiber optics to visualize the entire colon (also known as the large intestine) and possibly the last part of the small intestine. It is often performed for colon cancer screening. It also allows for treatment such as removal of polyps, biopsies of unusual areas or control of bleeding.

LENGTH OF PROCEDURE: The procedure usually lasts from 20-30 minutes but can take longer if polyps are present, if the colon is excessively long or twisted, or if excessive scar tissue exists. The extent of time required from check-in to check-out is approximately 3 to 4 hours.

AWARENESS DURING THE PROCEDURE: The procedure is usually done with either moderate “conscious” sedation (where you are comfortable during the exam, may fall asleep but are easily aroused) or with MAC (Monitored Anesthesia Care, using medications such as Propofol). Which one used depends on a variety of issues including your medical history and past experience with anesthesia. You may experience some cramping or “gassiness” during the procedure or after. If you have had prior problems with anesthesia, please let our office know immediately.

PREPARATION: Please follow the attached instruction sheets. Sometimes, depending on your other health problems and symptoms, your consult visit can be done at the time of the procedure to save you time. If you have any significant symptoms or medical problems, please schedule an office consultation prior to your procedure.

AFTER THE PROCEDURE: You cannot drive home after the procedure due to the IV sedation and you should not drive that day. You should take the rest of the day off and not operate any machinery, go to work or sign any legal documents for the rest of the day. It is preferable that someone stay with you until the following morning. You should be able to return to work the following morning.

COMPLICATIONS: Complications are rare, and can include (but are not limited to) bleeding, infection, pain, missed lesions, respiratory distress or bowel perforation. If one does occur, it will be treated appropriately and may require hospitalization, medication, additional procedure(s), blood transfusion or surgery. Please contact our office immediately if you experience any of the following:

- Temperature of 101 F degrees or higher at any time within 72 hours after the procedure.
- Blood from the rectum of greater than one teaspoon.
- Severe abdominal pain or vomiting.
- Any other symptoms that may concern you.

ALTERNATIVES: Alternative methods for colon cancer screening include sigmoidoscopy (only looks at the left side / lower part of the colon), barium enema (radiology study), 3-D virtual colonoscopy (not yet approved as a screening tool and usually not covered by insurance), and stool hemoccult testing. Please make an appointment in the office if you would like to discuss the alternatives further.

RESULTS & FOLLOW-UP: Procedure results will be given both verbally and in written form right after the procedure. They will be discussed with you and anyone waiting for you (if you allow). Pathology results will be mailed to you within a few weeks. We will contact you by phone if anything needs immediate follow-up. If you have not received your pathology results by 2 weeks, please contact the office for results. Follow-up office appointments will be made based on procedure findings. The timing of your next recommended colonoscopy is usually based on family history, findings at the time of colonoscopy, pathology results or other risk factors.

INSURANCE: Colonoscopies are usually covered by insurance companies. You may still be responsible for a deductible or a co-payment. While our office will generally pre-certify your procedure, IT IS YOUR RESPONSIBILITY TO CALL YOUR INSURANCE COMPANY TO VERIFY YOUR BENEFITS FOR THIS PROCEDURE. Medicare does not require precertification.
GI Procedures/Patient Financial Responsibility

Thank you for scheduling your procedures with Medical Clinic of Houston! Please note the following information regarding your financial responsibility. We will only bill and collect fees for Medical Clinic of Houston, LLP services performed by John T. Dugan III, MD, David S. Wolf, MD, and M. Behzad Zafar, MD. Fees for facility, anesthesia, pathology and laboratory fees (if specimens are obtained) are separate and not a part of our fee.

A financial counselor will verify the benefits with your insurance company for your scheduled procedures. If we have a contract with your managed care plan, we have agreed to file your insurance on your behalf and collect your out-of-pocket expenses, limited to deductible, co-insurance and co-pay based on rate contracted by Medical Clinic of Houston, LLP with your health insurance. The amount provided to you is an ESTIMATE of your out-of-pocket expenses. The estimated out-of-pocket must be paid in full to Medical Clinic of Houston, LLP prior to your procedures being performed. Please be advised that this is merely an estimate of your financial responsibility. Your claim will be filed to your insurance company and once they complete processing of the claim, your expenses could be more or less than originally estimated.

In order for us to continue to provide the best service, it is necessary for us to reduce our billing expenses. Therefore, you are responsible to update insurance information at the time of services. It there is no insurance to be filed; you will be expected to pay the fee in full prior to the procedure at a self-pay price.

Major credit cards are accepted over the phone. Checks and cash payment can be made in the office in addition to major credit cards.

Referral/Authorizations: If your health insurance requires a referral or authorization, you are responsible for obtaining the referral/authorization prior to your procedures being performed.

Please be advised that if you elect to be seen without a referral/authorization, or you have changed primary care providers without obtaining a new referral/authorization, or your referral/authorization has expired, you will be responsible for payment of our full charges.

For larger balances, extended payment or other payment plan options may be available. Please contact an MCH Account Representative by calling 713-526-5511 extension 4739.

Sincerely,
John T. Dugan III, MD, David S. Wolf, MD, and M. Behzad Zafar, MD
